

Gender Pay Gap Report for 2022/23

Motus is a diversified (non-manufacturing) business in the automotive sector with unrivalled scale and scope in South Africa, and a selected international presence, primarily in the United Kingdom and Australia and a limited presence in South East Asia, and Southern and East Africa.

Motus Group (UK) Ltd. manages the automotive interests of Motus Holdings Limited in the United Kingdom. These encompass 114 vehicle franchise outlets at 75 locations.

The business additionally operates specialist commercial vehicle body shops and has further interests in parts and service facilities and commercial vehicle equipment supply.

Motus Group (UK) Ltd. encompasses the UK's largest independent commercial vehicle dealer group and, with its passenger vehicle interests included, ranks inside from the Top 15 of all UK automotive dealer groups. The company has annual revenues of over £1 billion and employs almost 3000 people across its operations.

All employees of Motus in the UK as of the snapshot date of 4th April 2022 were employed by Motus Group (UK) Ltd.

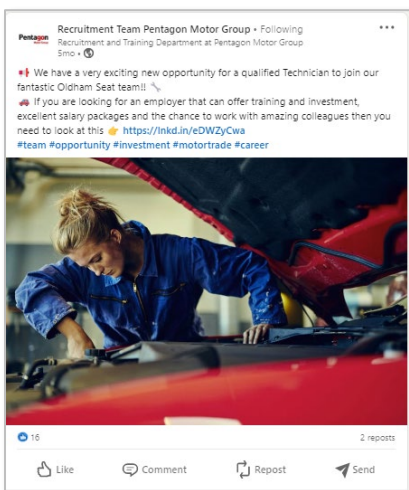

A primary reason for the pay gaps in our report is that there is a significantly higher proportion of male employees, both in general across the businesses, but specifically in 2 main areas where earnings are often higher than in other roles, namely in middle and senior management positions and in skilled technician roles (especially in our heavy commercial vehicle businesses). This situation is echoed by many other businesses in the automotive sector across the UK.

We are committed to addressing the under-representation of females both in the specific roles identified, and in general. Some of the initiatives we have undertaken to address this are:

- Highlighting stories of successful women within our businesses to potential new applicants with our recruitment marketing- see for example on the right, a social media post from a female apprentice on

International Women's Day in our Motus Commercials Division, and an advert recruiting for Technicians for our Pentagon Motus Group Division featuring a female employee.

- Active identification of and encouragement of high potential female employees within the business, including mentoring opportunities and participation in training and development events as part of our approach to Succession Planning. For example the Finance Director

of our Pentagon Motor Group Division is female having been developed and promoted through the business, we promoted a female to a Regional Director position in our Motus Commercials business in the last year having developed her through the business and there are high levels of female representation in our headline senior management development programme.

- Promotion of various family-friendly initiatives including supporting those returning from maternity leave, flexible working (including from home) and part time hours. These initiatives help our employees achieve a healthy work-life balance and help us retain our talent.
- Mandating the completion of training across all 3,000 UK employees on Diversity and Inclusion and also Unconscious Bias to help all employees ensure these critical matters are addressed in all facets of our business.
- Running of local working groups to look at issues surrounding the attraction of women into the company, to address any obstacles in female progression, and to ensure success stories on social media platforms.

We firmly believe these strategies and commitments will help us close the gap over time and move us (and the wider automotive industry) towards achieving true gender parity.

Declaration

I confirm the information contained within this report is accurate
